Profile

Hardworking and enthusiastic College Student working towards a computer technology in machine learning and data science. I am able to work independently in busy environment and also within a team setting. I am outgoing and tactful, and able to listen effectively when solving problems, I have a creative mind and am always up for new challenges.

Projects

Web App

- Creating Netflix app using the React Js ,API and Redux etc.
- Ecommerce webpage using React Js and API.
- Tweeter like app in Django which handle both side client side and server side.
- Todo-List in React Js and Django.
- Hangman game App

OpenCV

- Detect a particular object in OpenCV using CamShift Algorithm.
- Creating Four pointer to detect object.
- Video and Image detection using YOLO V3 model.
- Car Tracking and counting using yolo model and CamShift Algorithm.
- Face recognition and counting person.
- Multiple object detection with good accuracy.
- Using Deep Neural Network and tensorflow to detect object in open WebCam with 99% accuracy.

Python

- Fake news Detection
- Iris Species 100% Accuracy using Naive Bayes.
- House Price Prediction.

Education

High-Education - Ganga Bal Vidhya Mandir Sr Sec School, NeemKaThan

June 2016 - April 2017

Courses :-

- 12th in Mathematics
- Percentage :- 88%

Graduation - S.N.K.P Govt College, NeemKaThan

July 2017 - March 2020

Courses :-

- Graduation in Bachelor of Science(BSc)
- Percentage :- 67%

Post Graduation - Poornima University, Jaipur

2020 - 2022

Course :-

- Master of Computer Application (MCA)
- Pursing
